

# Six-channel drone strike gun

## DZ06-Pro

### Key Features

- Mainly used for countermeasures against drones
- The device adopts a portable design, free from constraints of any terrain or environmental conditions
- Equipped with standard rails for installing sights, night vision devices, etc
- Suppresses UAV control signals with interference range up to 2000m
- Use high-gain directional antenna to hit targets more accurately
- Large-capacity battery, providing sustained operation for over 50 minutes
- Provide worry-free after-sales service for international customers.
- Customize frequency bands for different country requirements.

## Specifications

Product model	DZ06-Pro Detection and attack integrated countermeasure equipment	
Performance name	Technical index parameter	
Equipment weight	About 8.3KG	
Device size (including battery)	Length 850mm* Width 200mm* height 130mm	
Antenna type	orientation	
Antenna gain	9dB	
Antenna Angle	60degree	
Power supply mode	24V9.6Ah	
Working hours	≤50 minutes	
Operating temperature	-20°C ~ +55°C	
Relative humidity	80%RH	
Extended function	Equipped with standard guide rail, can be installed scope, night vision, law enforcement recorder and so on	
<b>Jamming technical parameter</b>		
Interference frequency/power	Interference band	Channel power
	5.8GHz	20~30W
	800MHz、 900MHz、 2.4GHz	30W
	1.2GHz、 1.5GHz	10W
Interference distance	Open space ≥2000 m (depending on model/environment)	

## Dimensions

\*Based on actual product dimensions
