

Drone Detection and Strike Integration Gun

DZ08-Pro

Key Features

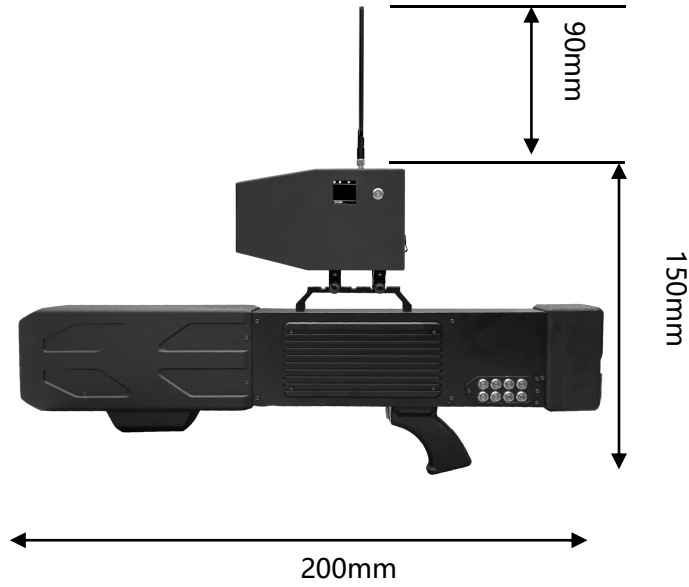

- Mainly used for countermeasures against drones
- The device adopts a portable design, free from constraints of any terrain or environmental conditions
- Automatic search, with audible alarms upon detecting suspicious signals
- The device integrates drone detection and countermeasure capabilities
- Detection range extends up to 3000 meters, with interference range also reaching 2000 meters.
- Large-capacity battery, providing sustained operation for over 50 minutes
- Provide worry-free after-sales service for international customers.
- Customize frequency bands for different country requirements.

Specifications

Product model	DZ08-Pro Drone Detection and Strike Integration Gun	
Performance name	Technical index parameter	
Equipment weight	About 8.3KG	
Device size (including battery)	Length 850mm* Width 200mm* height 130mm	
Antenna type	orientation	
Antenna gain	9dB	
Antenna Angle	60 degrees	
Power supply mode	24V9.6Ah	
Working hours	≤ 60 minutes	
Power dissipation	20W	
Operating temperature	-20°C ~ +55°C	
Relative humidity	80%RH	
Extended function	Equipped with standard guide rail, can be installed scope, night vision, law enforcement recorder and so on	
Jamming technical parameter		
Interference frequency/power	Interference band	Channel power
	5.8GHz	20~30W
	800MHz、 900MHz、 2.4GHz	30W
	1.2GHz、 1.5GHz	10W
Interference distance	Open land ≥2000 m	
Detection technical parameter		
Operating frequency band	2.4GHz、 5.8GHz	
Direction finding system	orientation	
Detection type	Dji and other brands quadrotor, DIY fixed wing, crossing machine	
Detection range	Open space ≥3000 m (depending on model/environment)	
Alarm delay	< 6 seconds (0~3km)
