

Audio Jammers

MDPB-L1M

Key Features

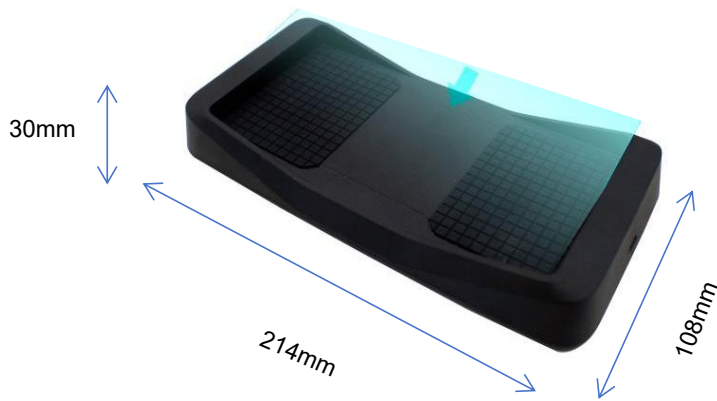

- Anti-app recording: APP software can not record normally even if the microphone is obtained;
- Wireless charging: Put the phone into the recording shield box, the power indicator turns blue, and the phone will be automatically charged wirelessly.
- Call security: When the phone is in the shielding box, the call content will be covered by noise;
- Good anti-recording effect: our self-developed FPGA-based ultrasonic noise algorithm can effectively interfere with mobile phone recording, and the anti-recording effect is at an advanced level, which can effectively prevent the mobile phone's own APP software recording and call recording, so as to ensure the security of information;
- Function of many devices: we have tested iPhone, Huawei, millet, OPPO, VIVO, Samsung, Nubia, Meizu, nuts and other new and old models of mobile phones, interference effect is good;

Specifications

| | |
|-------------------------|---------------------------|
| volume | 214×108×30mm |
| Wireless charging power | 15WMax.(Pro version only) |
| Power supply mode | DC12V/3A |
| Operating temperature | -10°C~55°C |
| Power consumption | 25W |
| weight | 219g |
