

Audio Jammers

MDPB-L7B

Key Features

- Recording shielding function: Using self-developed ultrasonic mixer to effectively shield portable recording equipment such as mobile phones and sound recorders. 360° omnidirectional acoustic shield design, three-speed ultrasonic mixing power can be adjusted to effectively cover the communication range;
- Good camouflage: used as a Bluetooth speaker, it shields recording while playing music, and has strong privacy;
- Safe and non-inductive: the use of ultrasonic noise interference technology, the human ear is not aware, no electromagnetic radiation, safe and healthy effectively block the recording function, no interference or damage to the hardware function of the mobile phone, the equipment meets the relevant product testing standards, harmless to the human body;
- Flexible mobile: built-in 6600mAh large-capacity battery, ultra-long life, can be flexibly placed in any position in the communication and treatment scene;
- Secret opening: It can be opened through the remote control attached to the product, or it can be ;

Specifications

Overall power consumption	20W
Operating voltage	DC20V
External power supply	45W PD3.0 USB-C power adapter
Built-in battery	6600mAh lithium battery Polymer battery
Wireless connection	Bluetooth 5.0 wireless technology
Product size	94mm*94mm*168mm
Product color	Silver gray
Product weight	1KG
Operating temperature	-10°C to 45°C
Working humidity	No more than 93, no condensate

Applicable scenarios

Meeting

Conversation

Private Space
